BUNDLED BRUSH:

For the safety and protection of our employees and equipment, we do require that branches and tree trimmings be no greater than three inches (3") in diameter and be cut, tied and bundled in three foot (3') lengths weighing no more than thirty-five pounds (35 lbs.) No containers over 45 gallons.

WHAT IS A YARD? HOW DO I MEASURE IT?

The truck collecting the debris will measure for you, the hopper (at the back of the truck) holds two yards at a time. Four cubic yards (4yd³) equates to WM filling the hopper twice. Any excess material left behind must be removed from public view until the following bulk pickup.
